

# INSTRUCTIONS

## Illuminator InstaStand

Includes:  
Carrying case  
InstaStand with  
LED lights  
Graphic

1

Table will arrive in closed position. Place the bottom panel (with electric cord) on the floor. Place hands under opposites sides of the top panel and gently pull upwards.

2

Table will automatically rise to the fully open position. Be sure to check the connection between the power supply and the power cord.

3

Flip table upside down so top panel is on the floor. Holding the bottom hem of the graphic, find one side seam and feel for the rigid cord inside the hem. Line up the side seam with the middle of one short side of the bottom panel and push the cord into the groove on the bottom panel.

4

Flip table right side up. Find the rigid cord in the top hem of the graphic and push it into the groove on the top panel. To ensure the graphic displays properly, do not twist the graphic.

5

For easy set-up you can leave the graphic on when you push the table to the closed position.

6

Insert plug from Illuminator InstaStand into electric socket. Be careful to place the cord where no one will trip over it.
