

# INSTRUCTIONS

## SlimFit Wave

Includes:  
Tube frame pole pieces  
2 Feet  
Graphic

1

Gather all pieces. Two S-shape pieces have strings that connect four segments. Align pieces & push together until metal tabs lock in place. Assemble pieces by lining up matching stickers & pushing hardware pieces together until metal tabs lock in place.

2

Place graphic above hardware & slide over the Wave shape, pulling left & right sides evenly downward. Once graphic is two-thirds down the Wave shape, pull the top of the graphic onto the Wave shape. Then pull from the bottom of the graphic to the floor. Note: You may find this step easier to complete with two people.

3

Line up assembled Wave shape & bottom bar above first foot & push down firmly.

4

Line up second foot to be in the same direction as the first foot. Line up assembled Wave shape & bottom bar above second foot & push down firmly.
