

INSTRUCTIONS

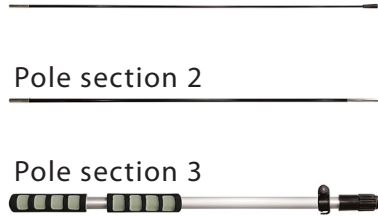

Basic Backpack Flags - Half Drop and Teardrop Shapes

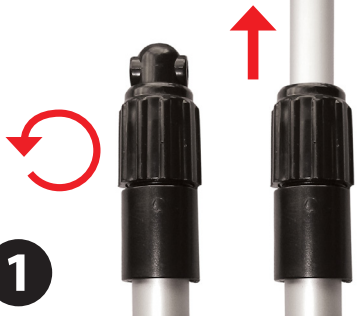

Pole section 1

Pole section 2

Pole section 3

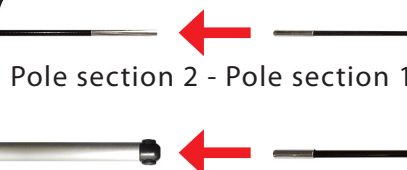

Includes:
Carry bag
Backpack
3 pole sections
Graphic

1

On pole section 3, turn the telescoping joint counterclockwise until you can extend the pole section. Once fully extended, turn telescoping joint clockwise to secure.

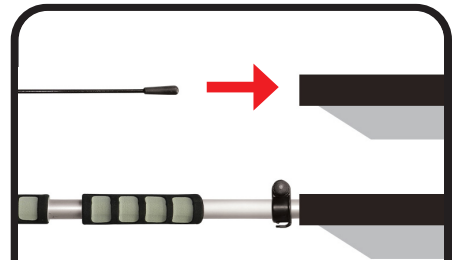

Pole section 2 - Pole section 1

Pole section 3 - Pole section 2

2

Assemble pole sections based on image above.

3

Slide the graphic onto the pole via the pole sleeve, starting from the small end with rounded tip. Be sure to feed the hardware all the way through the sleeve, to the tip of the graphic.

4

Loosen the screw of the attachment hook on pole section 3 and slide it towards the loop at the bottom of the graphic. Place the loop onto the attachment hook and adjust hook position to make banner flat (taut). Tighten the screw of the attachment hook to secure the banner.

5

Line up pole section 3 with the clamps on the backpack as shown. Before pushing the pole into the clamps, adjust the position of the attachment hook (if needed) to be above or below the top clamp while keeping the flag taut. Then push pole section 3 into the clamps on the backpack until they snap completely in place.
