

Art Checklist

1. Use VECTOR file format

Vector artwork allows us to resize properly without pixelating or losing quality.

2. Submit raster images at 300 DPI

We prefer vector art. If a raster image or photograph is provided, we will have no control over the color output of the print.

3. Outline **ALL** Text

4. Define colors as Pantone Solid Coated

Our printers only print colors from the Pantone Solid Coated library and CMYK. For better, longer lasting print quality and a more vibrant, consistent color we recommend selecting Pantone Solid Coated colors.

5. Provide 2" of bleed around artwork

6. Compress files larger than 5MB

For larger files please upload your artwork to Quinn through the following link: <https://quinnflags.wetransfer.com>. Upload instructions [here](#).

To make sending art easier you may also compress your artwork using either WinZip or WinRar. We cannot accept Stuffit files.

FILE FORMATS

.EPS
.AI
.PDF
.SVG

.JPEG
.PSD
.TIF
.GIF
