Art Checklist

1. Use VECTOR file format
Vector artwork allows us to resize properly without pixelation or loss of quality.

2. Submit raster images at ≥150 DPI
We prefer vector art. If a raster image or photograph is provided, we will have no control over the color output of the print.

3. Outline ALL text and lines

4. Define colors as Pantone Solid Coated
Our printers only print colors from the Pantone Solid Coated library and CMYK. For better, longer lasting print quality and a more vibrant, consistent color we recommend selecting Pantone Solid Coated colors.

5. Provide 2" of bleed around artwork (extend all art to the bleed lines of the template)

6. Compress files larger than 5MB
For larger files please upload your artwork through the following link: https://quinnflags.wetransfer.com. Upload instructions here.
To make sending art easier you may also compress your artwork using either WinZip or WinRar. *We cannot accept StuffIt files.*
